Lean Six Sigma Series

"Explore the Obvious"

The Lean Six Sigma Master Black belt training program focuses on deployment and project development approaches and more important, the leadership our candidates bring to organization and process transformation. The course flow follows project planning and oversight methodologies.

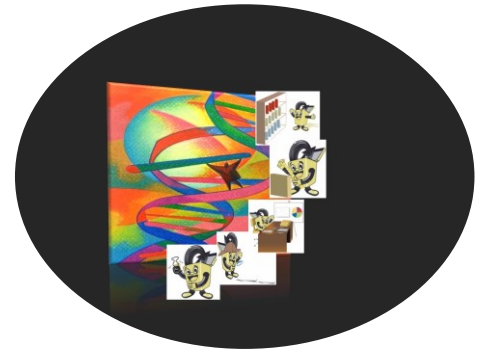

The 12 month training is done entirely in simulation and will introduce all of the key elements of Lean Six SIGMA with emphasis on the core methods and analytical tools that are important to sustainable improvement.

What Will I Learn?

- Enterprise-wide Planning and Deployment
- Cross Functional Competencies
- Project Planning, Management and Oversight
- Training Design and Delivery
- Mentoring Responsibilities
- Advanced Measurement Tools and Methodology
- Motivating and Managing the Team and Organization Dynamics
